DETAILED ACTION

Claim Objections

- Claim 1 is objected to because of the following informalities: the term
 "phosphomium [sic] atoms" in the last line of the claim should be "phosphonium ion."
 Appropriate correction is required.
- 2. Claim 8 is objected to because of the following informalities: in the interest of consistency, the letters "y" and "z" should be capitalized. (Compare variable X in the 4th line of the claim.) Appropriate correction is required.
- 3. Applicant's assistance is respectfully requested in correcting any other minor grammatical and/or spelling errors which may be present in the claims.

Claim Rejections - 35 USC § 112

- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 5. Claim 9 provides for the use of ionic liquids in hydrogenations, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced. Claim 9 is also rejected because the phrase "if appropriate" is unclear because it is undefined.

10/583,726 Art Unit: 1621

6. Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "irreversible occupation of the catalyst" is unclear.

Claim Rejections - 35 USC § 101

7. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

8. Claim 9 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd.* v. *Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Allowable Subject Matter

- 9. Claims 2-7, 10 and 12-15 allowed. The following is a statement of reasons for the indication of allowable subject matter:
- 10. The closest prior art appears to be US 3,919,271, cited by applicant in the IDS, which teaches catalytic hydrogenations using dispersions of metal halides in molten ammonium or phosphonium trihalostannates or trihalogermanates (column 1, line 65). The cited prior art neither teaches nor suggests the instant nitrile hydrogenation. Nor would it have been obvious to one of ordinary skill in the art at the time of the invention

Art Unit: 1621

to modify the process of the prior art in order to arrive at that of the instant invention. There is no motivation to do so.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: US 3,657,368 is cited to show related hydrogenations.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian J. Davis whose telephone number is 571-272-0638. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yvonne (Bonnie) Eyler can be reached at 571-272-0871. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
